About us

Shlara Automation Pvt. Ltd., Providers of Movement Control Technology Solutions was founded from an experience of thirteen years in the entrance automation business. This comes from the insight gained out of establishing & successfully running a multinational brand's manufacturing here in India. The indepth knowledge of the industry combined with the product knowledge has amply supported this initiative. Realising the need to address the importance of Quality, Access logic, Integration capability and Aesthetics combined with the opportunity South Asia as a region offers this enterprise was setup.

A dearth for this combined solution has always been felt by the industry not just in the subcontinent but the world-over. To address just this, Shlara Automation has partnered with Goosafe Security & PSM of Taiwan, Tormax of Switzerland to offer a range of pedestrian, vehicular and parking product solutions for India in particular and the SAARC region.

Shlara Automation offers reliable technology & much desired traffic process logic in its

products. This is an initiative that will address several aspirations of businesses in the region to offer security solutions that address several aspects of the buying process of the informed customer today.

It is common knowledge that offering a good product is just not the end but from a buyer's point of view, it is actually only a beginning in the right direction. With limitation to well-trained or skilled technicians in the country, it is of prime importance to support the initiatives of its System Integrator partners in the country. Shlara Automation will demonstrate unmatched project deliverable commitments directly and through its Integrating Partners. This support from Shlara Automation will eventually set the benchmark for the rest in the industry to adopt.

Shlara Automation wishes to introduce to the buyers in India a never before buying experience for reliable, aesthetically designed products. Welcome to Shlara Automation we deliver Smooth Access for Controlled Movement...
